

**CLAIMS:** The following is a listing of all claims in the application with their status and the text of all active claims:

1. (CANCELLED)
2. (CURRENTLY AMENDED) A weighted swaddling blanket comprising:

a blanket web [~~formed~~] forming a top and bottom surface of flexible material and sandwiching a baby in between, said top and bottom surface coupled at opposite ends by fastening means;

a plurality of compartment [~~means~~] assemblies secured to said top surface [~~for receiving pellet material therein to anchor said top surface~~] positioned on top of said baby, each of said compartment [~~means~~] assemblies comprising;

a pocket [~~stitching to said top surface, said pocket~~] having an opening only at one end extending across said pocket;

an interior pouch for receiving pellet material tightly sealed secured inside of said pocket;

whereby said baby is positioned and sandwiched between said top and bottom surface of blanket web, said compartment [~~means~~] assemblies of said top surface holding and swaddling said baby in place providing a sense of security and comfort and allowing said baby to sleep comfortably, a holding and swaddling effect provides said baby a simulation of secure feeling inside a womb.

3. (CURRENTLY AMENDED) The weighted swaddling blanket of claim 2 wherein the compartment [~~means~~] assemblies further comprises said fastening means between the openings of said pocket securing said interior pouch.

4. (CURRENTLY AMENDED) A weighted swaddling blanket comprising:

a top sheet of flexible material [~~and~~] capable of positioning on top of a baby;

a bottom sheet of flexible material [~~and~~] capable of positioning on a surface;

a plurality of compartment [~~means~~] assemblies secured to said top sheet [~~for receiving pellet material therein to anchor said top sheet~~] positioned on top of said baby, each of said compartment [~~means~~] assemblies comprising;

a pocket [~~stitching to said top sheet, said pocket~~] having an opening only at one end extending across said pocket, said opening has fastening means securing contents of said pocket;

an interior pouch for receiving pellet material tightly sealed secured inside of said pocket;

whereby said baby is positioned and sandwiched between said top and bottom sheet, said compartment [~~means~~] assemblies of said top sheet holding and swaddling said baby in place providing a sense of security and comfort feeling inside a womb and allowing said baby to sleep comfortably.

5. (CURRENTLY AMENDED) The weighted swaddling blanket of claim 4 wherein said top and bottom sheets are coupled together at opposite ends by [~~said~~] fastening means.
